

### HOTMELT ROLL COATER Mod. MELTCATOR SU-280

The MELTCATOR is a hot melt roll coater , to apply hotmelts onto materials over 0,5 mm thickness.

The model SU-280 features heavy duty construction and quality workmanship for years of operation.

Our Hotmelt Roll Coater is configured with a Pressure Bar-Attachment for fullsurface or edge gluing. For very thick materials the Pressure Bar Attachment can be removed.

The machine can also be ordered without the Pressure-Bar-Attachment shown on picture.

**ACTION :** The material will be feed between the pressure roller and the glue application roller. Stripper Fingers picking up the material from the roller.
